It has come to our attention that you and your neighbor may have damage from the 2009 hail storms and be in titled to a new roof at your insurance companies cost. This should be addressed before the upcoming winter season. Should this not be address in time, you would likely have leakage which could cause insulation problem, mold, rot, stains, and cracking plaster just to name a few.

CAUTION DON'T BE SCAMMED!!

Out of state companies are doing your neighbor's roof and will not be here to help you with any potential problems. When choosing a roofing company, it is important to choose a company that is **local** and **established**; whom stands behind there work. Be very **cautious** on out of state license plates, this is a good indication that the company is not local and/or subcontracting which mean on the move. In short, they are "storm chasers". **DO NOT** be miss lead by roofing companies stating they work **for** insurance companies in fact this is a conflict of interest. Insurance companies can not dictate whom you should use to replace your roof. Its your decision as the homeowner.
